

A Message from our School Board:

The Board of Education is committed to finding the most qualified candidate who can continue the progress made toward our strategic plan, the Denver Plan 2020. To this end, the Board is seeking to gather input from the community on each person's hopes and dreams for the future of the district and the qualities and characteristics that are most important in the next superintendent. We are seeking this input in multiple ways: traditional public comment style meetings, large community meetings that are organized in "house style" (see below for more information), small group meetings with organizations and organized groups, a community survey open to all stakeholders, and a supersearch@dpsk12.org email address at which board members can receive input from any stakeholder at any time.

If you are interested in participating in this dialogue and engaging with DPS Board members, please RSVP at the link below:
